Allowable Subject Matter

1. **Claims 1-23** are allowed.
2. **Claims 1-23** are renumbered.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, none of the prior art of record teaches or suggests while using a state-changing operation of the suspect circuitry to cause a failure due to the suspect circuitry, identifying one of the circuit paths that electrically changes in response to heat and detecting that a particular circuit portion therein is resistive.

Regarding claims 2, 3, 6-16 and 18, none of the prior art of record teaches or suggests detecting, in response to the selected portion being heated, a state-changing transition between a failed mode and a recovered mode in the suspect signal path site; and using the detected state-changing transition, determining that the signal path site has a resistivity that changes between the failed mode and the recovered mode with the rest of the claim limitations.

Regarding claims 4, 5 and 17, none of the prior art of record teaches or suggests electrically operating the die in a loop that causes the die to fail at a selected failure rate.

Regarding claims 19-23, none of the prior art of record teaches or suggests a detector adapted to detect, in response to the selected portion being heated, a state-changing transition between a failed mode and a recovered mode in the suspect signal path site; and a display adapted to use the detected state-changing transition and to display an image of the die to be used for

determining that the signal path site has a resistivity that changes between the failed mode and the recovered mode.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
